

WHAT IS HACK RIDGE?

Hack Ridge is a collaborative coding event that will bring together over 200 high school students on March 3, 2018 to compete in a 24-hour invention marathon. From the beginning, our hackathon has been an effort to unlock the inner creativity inherent to high school students. In a night of coding, designing, and learning, we hope to continue on our path to provide the next generation of developers with an opportunity to build real applications that can change their community. This year, Hack Ridge will take place at Maine South High School in Park Ridge, IL.

WHY SPONSOR US?

Sponsors help make our hackathon a reality, and the resources you can provide offer lasting memories to students. By sponsoring Hack Ridge, you will empower the next generation of designers and developers and brand your product or API amongst a pool of extremely talented and motivated students.

WHERE WILL YOUR SPONSORSHIP GO?

Your donations will be directly invested in improving the hacker experience at our event. This will include food, technology, swag, venue costs, and more. All contributions made towards Hack Ridge are tax-deductible.

	KILO \$250	MEGA \$500	GIGA \$1000	TERRA \$2500
